

Software Architect

HESEHUS A/S

Number of openings: 1

Advertisement publish date: 21/11/2018

Start date of employment: as soon as possible

Are you motivated by solving complex issues and do you have an eye for the technical overview? Do you want to work with the latest technologies and ensure the architecture on some of Denmark's largest webshops? Hesehus is looking for a skilled Software Architect passionate about making our customers e-commerce winners of the future.

What are we offering? Hesehus is Denmark's leading e-commerce house and we work with some of the most exciting and ambitious customers. Our product is unique as we deliver customer solutions from the market's most complete software platform developed internally in Hesehus. It allows us to work with the latest technologies like ASP.NET Core, GIT, Elasticsearch, Redis, Octopus and many more. Our projects consist of several thousand hours and involves everything from managing multi-site solutions all over the world to advanced integrations for different customer systems.

As a Software Architect at Hesehus you will become a part of one of the largest developer environments on Funen, that consist of more than 60 dedicated and highly qualified developers and architects. You will be part of the architect team consisting of four Software Architects, a System Architect and a Technical Writer. You will refer to our CTO, Martin Rud.

At Hesehus we focus on knowledge sharing and development. Hesehus Academy Fridays give you room for immersion and free play to try out new technologies. We also place great value on social arrangements both in our teams as well as across the organization. We cherish a healthy, informal and fun working environment.

Your primary tasks:

- Participating in customer meetings/workshops, including discussions of opportunities, budget, clarification of vision, business flows and technical requirements for the solution
- Architecture and technical dialog with developers and teams
- Code reviews and technical dialogues with the developers about best practice and technical direction
- Translate use cases and project descriptions to technical tasks for the developers
- Ensuring that architectural model meets Hesehus' quality demands and that the right technological decisions are made on the projects.

Who are you? You are experienced in software development either as senior developer or as architect and have a higher education within IT. You have experience with software architecture and understand to analyse the pros and cons of different architecture patterns. You know concepts like "loose coupling" and "separation of concerns" and how it is implemented in practice. If you are familiar with the .NET platform and have experience developing ASP.NET and ASP.NET Core web solutions, you are ahead of points. Additionally, you have experience with React, Redis, Elasticsearch, Azure and other similar technologies.

You are quality-conscious, structured and used to a work day with responsibility, varied work tasks and a large daily interface. You are service minded and good at networking. Simultaneously, you are a competent

communicator who can convey complex knowledge. You are solution oriented and always see opportunities instead of challenges. We expect you to be curious by nature and that you keep pace with the newest technologies.

Hesehus add-ons:

- Great influence on own career with among others, staff development interview two times a year.
- Family friendly and flexible working hours
- Parental leave with good conditions
- Free health insurance
- Company lunch program + snacks, coffee and fruit available all day
- Breakfast Friday morning and Friday bar
- Possibility to buy dinner for the whole family
- Beautiful premises located centrally at the harbour in Odense with free parking
- Masseur arrangement without self-payment
- Running Club
- Great discount program including LogBuy
- Social activities all year round eg. Family day, soccer tournament and poker evening.

Apply for the job

We offer a competitive salary based on your experience, as well as pension and healthcare insurance. We interview on an ongoing basis and employ when we find the right person for the job.
