Functieomschrijving

As a Supply Chain Consultant you have one goal: to provide the customers with innovative supply chain solutions.

You become a reliable partner of the customer for the entire project lifecycle. You visit the customer on a regular basis (about 30% of your time).

You start with analyzing the customer 's planning challenges and advise them in designing their new planning environment. You implement the planning and scheduling solution with our rich planning tools and validate it with the customer 's project team. Finally, you train the customers in the use of their new APS.

At all times you work in close collaboration with your colleagues.

As a more Technical Consultant you take care of the more technical part of the job, e.g. integration issues and customized algorithms.

We coach and encourage you to develop your career and yourself and grow into leading roles.

Profiel

As an Application Supply Chain Consultant, you have a master's degree with specialization in production management and/or logistics and a strong affinity for IT .

As a Technical Supply Chain Consultant, you have a master's or bachelor's degree with a technical background combined with a basic interest in supply chain planning.

You are fluent in English and you enjoy working in a multi-national customer-driven environment. Knowledge of other languages is a plus (Dutch, French, German or Spanish).

You are creative, eager to learn and have an attention to detail. You are passionate about what you do, fun to work with and a great team player.
