

# VACANCIES WHAT ARE WE LOOKING FOR IN THE NETHERLANDS?

Here is a small selection of the vacancies in the Netherlands. You can find more vacancies on the EURES website: [www.eures.europa.eu](http://www.eures.europa.eu), and information on [www.werk.nl/eures](http://www.werk.nl/eures)  
Online version of this paper: [http://bit.ly/EURES-Jobs\\_in\\_the\\_Netherlands](http://bit.ly/EURES-Jobs_in_the_Netherlands)

## Language

For all vacancies knowledge of English is required.

**If you don't speak English: Don't write.**

All vacancies are full-time or near full-time (36 – 40 hours).

## How to react:

Send a CV and Cover letter by email to the contact. Your CV should be in English. Mention the vacancy number in your reaction.

**Deadline:** If the reaction deadline has passed, you are still advised to send your CV and motivation. The employer or recruiter might have similar vacancies.

**These vacancies are open to EU/EER nationals only.**

This list was compiled December 12ft 2018.

## IT and technical jobs

### Software Engineer (Real Time)

Netherlands (NL) : Zuidoost-Noord-Brabant 8 day(s) ago (04/12/2018)

As a Software Engineer you are responsible for the full lifecycle of software for complex modules and machines. You work with a code base of C, C++, Python or C

You cooperate closely with colleagues from all other disciplines and strategic customers in a multi-disciplinary team. The software team works in an agile fashion in scrum teams.

The department Technology & Development (T&D) is responsible for the development, specification, design and engineering of high tech/precision modules, professional products and capital intensive equipment.

**PROFIL OF EMPLOYEE:**

- Experience with Real time control software and Real time Operating systems / Linux / Sun Solaris / VxWorks
- Experience with high tech complex machine control
- Knowledge of C / C++ / C# / Python
- Good command of the English language, spoken and written

**SKILLS:**

Bachelor or Master degree informatics or technically oriented with 5 years experience in an equivalent role

**HEALTH INSURANCE PROVIDED**

**ACCOMMODATION PROVIDED:** including water, gas, electricity and internet bills

**TRAVEL PROVIDED:** one way travel costs to Holland. Daily travel expenses between house and work

Position type: Temporary to hire

Contract type: 6 month; Full-time  
Start date: asap

Job vacancy Id: WBS5041118

## *Software Lead Engineer*

Netherlands (NL) : Zuidoost-Noord-Brabant  
As a Senior (Lead) Engineer at VDL ETG you are the driving force and responsible for coaching of junior colleagues, realization of the architecture in design, implementation, test and integration and maintenance of software for complex modules and machines.

You work with a code base of C, C++, Python or C#. This code base is under strict configuration management in order to deliver in a reliable way for multiple systems and multiple users.

- You cooperate closely with colleagues from other disciplines and strategic customers (mechanics, mechatronics, electronics, equipment engineering) in a multidisciplinary team.
- The software team works in an agile fashion in scrum teams.
- You see it as a challenge to take up new things and explore new tools and techniques

### PROFIL OF EMPLOYEE:

SKILLS: - Bachelor or Master degree informatics or technically oriented with 10 years' experience in an equivalent environment

- Large experience with high tech complex machine control
- Experience in coaching and leading smaller software teams
- Experience with independently designing and delivering software modules
- Experience with Agile software development
- Experience with Model Driven Design
- Large experience with Real time control software and Real time Operating systems / Linux / Sun Solaris
- Experience with industrial bus systems
- Knowledge of Design Patterns
- Knowledge of C / C++ / C# / Python
- Experience with Continuous Integration and Configuration Management
- Good command of English language, spoken and written

HEALTH INSURANCE PROVIDED

ACCOMMODATION PROVIDED: including water, gas, electricity and internet bills  
TRAVEL PROVIDED: one way travel costs to Holland. Daily travel expenses between house and work

Position type: Temporary to hire

Contract type: one year; Full-time

Start date: asap

Job vacancy Id: WBS5041018

## *Plasterer*

Netherlands (NL) : Zuidoost-Noord-Brabant

Category: Plasterers

For the construction sector in The Netherlands, we are hiring Plasterers.

Plasterers Charged with putting lime, preparing mortars and taking care of all necessary materials at the destination.

Responsible for all types of plastering work.

HEALTH INSURANCE PROVIDED

ACCOMMODATION PROVIDED: including water, gas, electricity and internet bills

TRAVEL PROVIDED: one way travel costs to Holland. Daily travel expenses between house and work

Position type: Temporary to hire; contract for 6 month's

Contract type: Full-time

Start date: asap

Job vacancy Id: WBS5037918

## *System Designer Mechatronics*

Netherlands (NL) : Zuidoost-Noord-Brabant

As a System Designer Mechatronics you are involved within the complete lifecycle of both systems and products as during the production phase. You are the technical interface for the company clients and set up requirements and specifications for the system and the development process.

PROFIL:

You are in charge of your module, complex mechanical parts and/or fully integrated systems; from design, testing, production, assembly. As a System Designer Mechatronics you are involved within the complete lifecycle of both systems and products as during the production phase.

You are responsible for:

- Make design/interface choices, collaborate and set compromises with other disciplines (mechanical, software, electronics)
- Module owner and therefore monitor system requirements;
- Modelling the system to provide the right sub requirements;
- Verification of technical plan of all disciplines;
- Collaborate and support with architects;
- Execute integration process (TPS/TAR);
- Issue management and finding the best solution;
- Hardware/Software interface development for 'own' and 'third party' modules;
- First point of contact for questions regarding production, integration and service.

#### SKILLS:

Bachelor or Master Degree in Mechatronics or Mechanical

HEALTH INSURANCE PROVIDED

ACCOMMODATION PROVIDED: including water, gas, electricity and internet bills

TRAVEL PROVIDED: one way travel costs to Holland. Daily travel expenses between house and work

Position type: Temporary to hire, contract 6 month's

Contract type: Full-time

Start date: asap

Job vacancy Id:

WBS5030218

## *Mechatronic System Architect*

Netherlands (NL) : Zuidoost-Noord-Brabant

As a system architect dynamics and motion control you are responsible to setup and create a technically roadmap and requirements of a consistent system design that meets the functional specifications of our customers' needs.

You are responsible for:

- Functional breakdown, responsibility, ownership, integration, sustaining and troubleshooting.
- Translating system requirements into specifications and roadmaps for architecture, technology, functions and modules.
- Definition of a generic machine platform, based on modular design.
- Guiding the process.
- Initiate EC's.
- Input for development milestone planning.
- Collaborate and support with architects.
- Machine safety.

#### PROFILE:

At least 5 years relevant experience in high tech equipment

• Eager to define concepts, interfaces and mechatronics architecture.

• Team player, in the own company and towards clients, consortium, partners and suppliers..

• Efficient in dealing with time pressure and budget constraints.

• Good communication skills and proficient in English and preferably in Dutch.

• Good time management and setting priorities

#### SKILLS:

Technical University, Master degree in Mechatronics, Electronics or Mechanics

Good communication skills and written in English and preferably Dutch

HEALTH INSURANCE PROVIDED

ACCOMMODATION PROVIDED: including water, gas, electricity and internet bills

TRAVEL PROVIDED: one way travel costs to Holland. Daily travel expenses between house and work

Position type: Temporary to hire. One year contract.

Contract type: Full-time

Start date: asap

Job vacancy Id: WBS5029418

## *Lead Electronics Architect*

Netherlands (NL) : Zuidoost-Noord-Brabant

The electronics architect in the lead will contribute to the ongoing growth in development, engineering and the competence Electronics. Within this role you will be responsible from concept till qualification of high-end mechatronic systems.

You will also be the team leader for the internal and external project team (in the lead). In this role, you will be challenged to develop and strengthen a broad set of skills.

One of your biggest challenges will be to communicate with all the stakeholders in the different phases of the project.

During the concept phase you will mainly communicate with architects from other disciplines and competence leaders to make trade-offs and define the concept design.

During the design/implementation and verification phase you will lead the team (including the external partner) to make and review the electronic designs.

Furthermore you are responsible for:

- Developing architectural concepts in multidisciplinary teams,
- Meeting with clients to specify a clear interpretation of the customers demand.
- Specification of electronic modules and systems, electronic components (sensors, amplifiers, PCB's) and control platforms
- Performing trade-offs for implementation alternatives of functions
- Managing outsourcing activities at electronics development partners,
- Leading the electronics designers and engineers in the multidisciplinary project team,
- Contributing specialist knowledge in one or more electronic engineering fields, such as signal processing, analog, digital and power electronics, firmware, high voltage electronics, PCB lay-out, EMI, etc.
- Supporting allocation of manufacturing and other supply chain decisions,
- Transferring knowledge to production- and service engineers.
- Documenting specifications, concepts, designs and test analysis results.

HEALTH INSURANCE PROVIDED

ACCOMMODATION PROVIDED: including water, gas, electricity and internet bills

TRAVEL PROVIDED: one way travel costs to Holland. Daily travel expenses between house and work

Position type: Temporary to hire. One year contract.

Contract type: Full-time

Start date: asap

Job vacancy Id: WBS5028518

## VHDL / FPGA Designer

Netherlands (NL) : Zuidoost-Noord-Brabant

Category: Applications programmers

You will be responsible for defining and realizing new VHDL firmware designs and for modifying existing VHDL firmware, including the hardware/software interface of the machine.

Your activities include specifying and documenting requirements, implementing and simulating VHDL code and also testing the firmware in test setups and in the machine module.

As a VHDL/FPGA Designer you are the first point of contact for questions related to this topic. In the projects, you work together with the electronics architect and designers of all disciplines (software, mechatronics, mechanics).

This position is based in the Electronics group of this organisation. In this position you will report to the group leader Electronics.

SKILLS:

- Bachelor Degree or master degree in Electrical Engineering
- At least 5 years of industrial experience in VHDL for FPGA design (VHDL RTL, synthesis, compilation and timing closure).
- Experience with Quartus/Xilinx ISE and functional+gate level simulation using Mentor Modelsim and/or Questa Sim.
- Experience with debugging tools (ILA ChipScope, signaltap) and lab equipment.
- Affinity to work and discuss with hardware and software engineers on a technical level.
- Affinity with mechatronics/control systems is a plus!

Personal skills:

- Team player, analytical, pragmatic, creative and pro-active
- Good communication skills and proficient in English
- Ambition for a broad personal development in the technology field.
- Good in time management and setting priorities.

HEALTH INSURANCE PROVIDED

ACCOMMODATION PROVIDED: including water, gas, electricity and internet bills

TRAVEL PROVIDED: one way travel costs to Holland. Daily travel expenses between house and work

Position type: Temporary to hire. One year contract  
Contract type: Full-time

Job vacancy Id: WBS5028118

## *Integral Project manager*

Netherlands (NL) : Zuidoost-Noord-Brabant  
You manage projects with a large multidisciplinary team of highly skilled, mainly technical experts, that's why we expect you to have mechatronic expertise as well as professional project management skills.

You are responsible for:

- The delivery of innovative mechatronic systems from development until manufacturing and customer acceptance.
- Delivering within boundaries as agreed in project assignment (time, quality, budget and scope).
- Leading the team on technical aspects in close cooperation with a System Architect assuring decision taking in the technical domain.
- Monitoring and control project progress including supply chain and manufacturing activities.
- Managing stakeholders: external customers as well as international stakeholders at various managerial levels and functional domain (T&D, business, manufacturing and others).
- Managing external partners and component suppliers.
- Applying the project management and development of the project management competency of the department.

Experience: At least 5 to 10 years experience as a project leader in a high-end environment, leading multidisciplinary development team(s).

You have knowledge of Design of Excellence.

Successful track record within equipment development projects.

You are a team builder and able to inspire, motivate and convince people.

You are pro-active, analytical, creative person with a "can do" mentality.

HEALTH INSURANCE PROVIDED

ACCOMMODATION PROVIDED: including water, gas, electricity and internet bills

TRAVEL PROVIDED: one way travel costs to Holland. Daily travel expenses between house and work

Position type: Temporary to hire  
Contract type: one year contract Full-time  
Start date: asap

Job vacancy Id: WBS5010818

## *Final Assembler*

Netherlands (NL) : Zuidoost-Noord-Brabant  
Category: Electrical and electronic equipment assemblers

For one of the world's leading manufacturers of heavy machinery (construction and minery), we are hiring a Final Assembler to work in The Netherlands.

Your job consists of:

- Finishing equipment: building and completing using mechanical and hydraulic parts.
- Small welding: assemble and welding small parts to the product, such as seals, cantilever, etc.
- Checking and polishing: checking with a mold if the product is up to the measurements and make the product paint-ready.
- Keeping the workplace clean.

PROFIL OF EMPLOYEE:

- Good ability using manual and automatic tools.
- Experience with hydraulic and mechanical components.
- Experience in handling an overhead crane.
- Experience in reading technical drawings.
- Some experience in paintwork is a plus.

HEALTH INSURANCE PROVIDED

ACCOMMODATION PROVIDED: including water, gas, electricity and internet bills

TRAVEL PROVIDED: one way travel costs to Holland. Daily travel expenses between house and work

Position type: Temporary to hire

Contract type: 6 month, Full-time

Start date: asap

Job vacancy Id: WBS5010718

## *Maintenance Technician Food Industry*

Netherlands (NL) : Zuidoost-Noord-Brabant

You are responsible for the organization's ultramodern machinery. (Preventive) Maintenance, solving malfunctions and attribute to the longevity of the machines.

Carrying out inspections based on maintenance planning / system

- Coordinate with colleagues about details or particularities of the relevant machine / installation.
- Collection of necessary parts and tools in the technical warehouse.
- Carrying out preventive maintenance and working on malfunctions ((dis) assembly, replacement and / or adjustment of parts using various (hand) tools.).
- Analysing the reported failure/malfunction by consulting a manual or colleagues.
- Assess available information, find out the cause of the failure and determine possible (temporary) solutions while keeping the stop as short as possible.
- Giving directions to colleagues with regard to more sustainable use.
- Testing of the machine and 'ready for use' delivery of the machine / installation.
- Establishing bottlenecks and improvement measures in the maintenance process.
- Delivering a contribution to the investigation and implementation of improvements in the maintenance process based on instructions from the supervisor.
- Record component data / work requests in the maintenance system.
- Registering used materials and hours and linking this to work assignment.

You have a completed vocational education in the field of electrical / cooling technology, supplemented with mechanical training.

- You have experience as a maintenance technician or mechanic in the technical (maintenance) department.
  - You have technical knowledge of the machines and installations in the food processing industry.
  - You are quality and service oriented.
  - Willingness to (over-) work in rotating shifts
- Minimum experience of 2 or 3 years as a maintenance technician in industrial facilities, preferably in the food sector.
- In possession of NEN 3140 is a plus (Operation of electrical installations - Low voltage).

HEALTH INSURANCE PROVIDED

ACCOMMODATION PROVIDED: including water, gas, electricity and internet bills

TRAVEL PROVIDED: one way travel costs to Holland. Daily travel expenses between house and work

Position type: Temporary to hire

Contract type: 6 month, Flexible, rotating shifts

Start date: asap

Job vacancy Id: WBS5010618

## *High Precision Mechanical Engineer*

Netherlands (NL) : Zuidoost-Noord-Brabant

Your most important tasks are related to the development and producible process according to PGP (Product Generation Process)

Feasibility phase: The study of the Customer

Requirement Specifications (CRS) and the feasibility and procurement of mechanical components;

Definition phase: Coming up with a Description of System Design Requirements and Specifications;

- The generation of system design concepts and reviews;
  - Coming up with well-considered choices, validated against system requirements;
  - Defining the high-tech modules and related technical interfaces;
  - Monitoring that the projects remain within the agreed specifications;
  - Using a helicopter view and creativity in order to find solutions in case of conflicts;
- Detail phase: Being part of a multidisciplinary team of approx. 10-15 designers/lead designers and architects;
- System verification: Verification of design requirements and chosen concepts;
- Production release: Release of the design for production.

Additional tasks:

- Contributing to the system road-maps.
- Participating in further developments of the necessary critical mechanical competencies.
- Setting priorities within the mechanical team and reporting routinely to the project manager.
- Providing direction to the Way of Working (including with the help of V-model, PGP-process, design reviews, engineering change process)

- You have experience with design principles, meticulous positioning, dynamic behaviour,

material characteristics, clean room environment, design for reliability, vacuum design rules;  
- You have experience with DfX ("Design for Manufacturing", value engineering, producibility, cost price calculation, reliability, serviceability) - You have experience with 3D design tools NX or Solidworks.

HEALTH INSURANCE PROVIDED

ACCOMMODATION PROVIDED: including water, gas, electricity and internet bills

TRAVEL PROVIDED: one way travel costs to Holland. Daily travel expenses between house and work

Position type: Temporary to hire

Contract type: 6 month; Full-time

Start date: asap

Job vacancy Id: WBS5010518

## *System Thermal and Flow Architect*

Netherlands (NL) : Zuidoost-Noord-Brabant

As a System Thermal and Flow Architect you are responsible for specifying and delivering high level solutions for complex mechatronic systems and modules. The goal is to enable optimal thermal and flow functionality against cost effective engineering solutions.

Your main tasks are related to the Product Generation Process (development process) this includes:

- Feasibility phase; study the Customer Requirements Specifications (CRS) and investigate the feasibility of thermal and flow concepts Definition Phase; come up with Description of System Design Requirements and Specifications (SDS).
- System Design Phase; generation of system design concepts
- Come up with well-considered choices, validated against system requirements. Review designs (e.g. via FMEA) with internal and external customers.
- Perform detailed thermal and flow analysis and define measurement setup for function verification.
- System Verification; verification of design and chosen concepts on the specified and agreed requirements.

At least 8 years of experience in creating new equipment concept (or large modules)  
Experience with mechanical design principles, dynamic behavior, material properties, contamination control, cleanroom environment, vacuum design rules, particle transport under different circumstances (e.g.) atmospheric and vacuum design rules.  
SKILLS: Master degree in Mechanical engineering, Physics or equivalent with a focus on Flow and Temperature control.  
Excellent knowledge of (FEM) calculations in the area of thermal management, flow control on liquids and gasses.  
Experience with 3D design tools (preferably NX or PRO-E) and team center.  
Experience with ANSYS, Hyperworks, Matlab, Simulink, or related development tools. Experience with lithography is a plus.

HEALTH INSURANCE PROVIDED

ACCOMMODATION PROVIDED

TRAVEL PROVIDED: one way travel costs to Holland. Daily travel

Position type: Temporary to hire

Contract type: 6 month; Full-time

Start date: asap

Job vacancy Id: WBS5040218

## *Robotic Welding Operator*

Netherlands (NL) : Zuidoost-Noord-Brabant

- Weld LHEX buckets according to technical drawing both with the aid of robot and manually
- Placing the product on the manipulator, choosing the right program and checking the correct development of the procedure.
- Do the manual correction of the welded products if necessary
- Keeping the workplace clean and perform small maintenance on the welding machine.
- Following internal and external training

PROFIL OF EMPLOYEE:

- Flexible, enthusiastic and studious.
- Affinity with robotic installations is an advantage
- Able to work both independently and in a team
- result driven and goal-oriented
- Willing to work in 2 and 3 shifts
- Willing to learn

#### SKILLS:

- Experience in MIG/MAG welding of heavy constructions with multilayer technique
- Experience in operating an overhead crane
- Read and understand a constructional drawing
- Welding Procedure Specification (WPS) 22 and 23

#### HEALTH INSURANCE PROVIDED

ACCOMMODATION PROVIDED: including water, gas, electricity and internet bills

TRAVEL PROVIDED: one way travel costs to Holland. Daily travel expenses between house and work

Position type: Temporary to hire

Contract type: 6 month; Flexible

Start date: asap

Job vacancy Id: WBS5039718

## CNC Machine Operator

Netherlands (NL) : Zuidoost-Noord-Brabant

Robotic Welding Operator

Your job consists of:

- Programming the CNC process: depending on the dimensional tolerance, shape and place
- Checking the CNC process during the CNC machining
- Checking the products: tight, but free of strain
- Finishing the products: trimming and checking
- Basic maintenance on the machines + keeping the workplace clean

#### PROFIL OF EMPLOYEE:

- Intermediate English
- Flexible, Enthusiastic, Studious
- Able to work both independently and in a team
- result driven and goal-oriented
- Willing to work in 2 and 3 shifts

#### SKILLS:

- Minimum of 2 years experience in CNC Machining using a CNC milling machine (5 axis)
- Experience in milling (conventional or CNC)
- Knowledge of the **Heidenhain** control system (or willing to learn), knowledge of Fanuc is an advantage
- CNC programming based on a constructional drawing using Heidenhain language
- Experience in handling an overhead crane

#### HEALTH INSURANCE PROVIDED

ACCOMMODATION PROVIDED: including water, gas, electricity and internet bills

TRAVEL PROVIDED: one way travel costs to Holland. Daily travel expenses between house and work

Position type: Temporary to hire

Contract type: 6 month; Flexible

Start date: asap

Job vacancy Id: WBS4988618

## Healthcare

### *Nurses in the Netherlands* **PLEYADE**

<http://www.pleyade.nl/site/werken-bij/opportunities-for-international-talent/>

No agencies involved.

A straight labour agreement from PLEYADE

Pleyade is part of the Dutch Healthcare Group for Arnhem - Nijmegen, comprising nursing homes, hospitals and educational institutions. Pleyade actively participates in research on the use of technology in healthcare and nursing. Pleyade is innovative, with examples such as the use of Tinybot

<https://youtu.be/zouFoNWHCL4>

We're good. You make us better.

PLEYADE, THE PHILOSOPHY

You are the future leadership talent in healthcare. You are a graduate nurse. You are ambitious, enthusiastic, excellent, and never lose sight of the human side of care. You love caring for the elderly. We challenge you to develop yourself from unique talent into a leader at the best healthcare employer.

We offer you various courses. To do this, we'll offer you various training and development opportunities. Do you want to make the difference? Come on and make us even better!

Pleyade offers comforting convalescence, nursing and support to the elderly in Arnhem, Elst and the Liemers region. We are involved, respectful and have genuine attention for our clients. Our more than 1,300 employees and 600 volunteers strive every day to ensure our clients feel good.

Pleyade is part of the Dutch Healthcare Group for Arnhem - Nijmegen, comprising nursing homes, hospitals and educational institutions. Pleyade actively participates in research on the use of technology in health care and nursing.

We're looking for unique talent! Want to find out more?

#### Tasks and responsibilities:

Pleyade's nurses care for people, mainly the elderly, within an institution and at people's homes and / or for those people who are returning to the nurse for convalescent care. In some cases, in addition to nursing, people also need care and guidance in the final phase of their lives.

As a Pleyade nurse, you will advise and train your caregivers. You are often called upon for specific nursing procedures that the caregiver is unable to perform, for example administering a drip. You recognise illnesses and changes in the state of patient health and take necessary action.

You also offer team support in the physical care of patients, for example by brushing teeth or washing them. You also have an important social role, trying to establish trust with clients and providing intensive guidance to elderly people with psychological, psychogeriatric or social problems.

Another important social function is maintaining contact with the caregivers - relatives / family members who care for the elderly.

You do your work according to care plans and nursing diagnoses, and you compile reports. You also regularly consult with colleagues, team leaders and other professionals such as caregivers, physiotherapists, psychologists, social workers and (nursing home) doctors.

During the introductory period and pre-registration period you will not be able to perform nursing duties. At this time, you'll work with your future colleagues and assist in non-nursing work for and with the patients.

Nurses from abroad are allowed space and time at Pleyade to get used to working in the Dutch system. You don't have to bear all the responsibilities of a nurse straight away. In the first year, you'll be accompanied by experienced colleagues, growing in your role as a nurse step by step. We call this the development period.

This provides the opportunity to become accustomed to the Dutch way of working. You'll also see how your Dutch improves over the year allowing you to better help your patients. Working straight for Pleyade means job security in a safe environment in your own area of specialisation, with better pay, better benefits and social security, including Dutch pension contributions from day one.

This vacancy is open to all EU Nationals.

#### Extras:

For non-Dutch speakers: Dutch language training B-1 is arranged.

If so, ask for the special program.

Special Dutch courses are held in Italy, Greece, Spain and Portugal. So send an email and ask for opportunities.

Location: Arnhem, Elst and De Liemers.

Vacancy number: WBS2898817

## *Graduated Nurses*

Nediacare is looking for Graduated Nurses, who want to make a difference for the elderly in health-care institutions in the Netherlands.

Would you like to work in the elderly care in the Netherlands? Then we are looking for you!

Nediacare is on behalf of Dutch health care institutions looking for European graduate nurses who can offer complex care, who dare to take responsibility and above all want to mean something to the Dutch elderly.

Are you in possession of the qualification 'Laurea in Infermieristica | Graduated nurse and do you see yourself living and working in the Netherlands, look what we can do for each other, because caring is something you do together!

What do we expect from you?

- o You are in the possession of the diploma Laurea in Infermieristica | graduated nurse healthcare'
- o You have an European nationality or permission to work in Europe
- o You have some work experience in health care institutions and/or in hospitals
- o You are caring and a high quality of care is most important to you
- o You have an affinity with the elderly and you know how to act in complex situations.
- o It seems a fun challenge to you to live and work in the Netherlands, for at least a minimum of 15 months.
- o You are not afraid to work with maximum effort to learn the Dutch language and culture, of course with maximum support by our education team!

What can you expect from Nediocare?

- o Right away you get an employment contract based on 36 hours/week for at least 15 months in a healthcare institution in the region of Noord-Brabant, the Netherlands.
- o There are good benefits in prospect: the first 3 months leading up to your Big-registration a gross monthly wage of €1,835,00 after obtaining the Dutch language NT2 level B1 certificate, the salary advances, for a registered nurse Big-registration, to gross €2,460, monthly.
- o Accommodation is arranged by the health care institution, expenses for you are estimated max. €450.00 monthly
- o Upon arrival in the Netherlands the Nediocare-team will be waiting for you to support and introduce you to all you things you need and, and of course, even more. Most important is that you are not on your own.
- o You will get support to arrange all the facilities you need to be able to work and live in Netherlands for instance: BSN number, insurance, bank number etc.
- o The first 3 months you will get intensive (NT2) Dutch language lessons, Dutch cultural classes and training in medical/technical care
- o Our Nediocare project mentors are during the entire time available for you to assist in everything you need

o During your work, you will also be accompanied by a mentor of the health-care institution and there is constant communication between Nediocare and the institution with regard to your guidance and support  
What's in it for you?

- A unique way to work – and obtain life experience in the Netherlands
  - Permanent registration in your nursing profession.
  - A unique way to work on your future.
  - Working with international colleagues and being able to build a special group of friends.
- Does this sound appealing to you and do you dare to take up this challenge, then you are invited !

Location: Noord Brabant

EURESVacancy number: WBS508418

## *Nurses in the Netherlands* **EMTG**

European Multi Talent Group Health Care BV is a Dutch company situated in the area of Amsterdam. We are a recruiting company specialized in personnel for the cure and care in The Netherlands.

We are looking for registered nurses who are willing to work in the elderly care and in the hospitals.

Our customers are part of the Dutch Public Care System and take care of their clients who are not longer independent. For our clients Vivium Zorggroep, Stichting Livio, Sint Franciscus Gasthuis, Aafje Thuiszorg, Zorgbalans, RSZK, Cordaan Thuiszorg en Happy Nurse Thuiszorg established in Amsterdam, Rotterdam, The Hague, Eindhoven, Arnhem, Utrecht and their surroundings are looking for candidates.

**Requirements:**

- Nationality of a member country of the European Union;
- English or German, the preferred level is A2;
- Graduated for the education of nurse of your home country;
- Experience of at least three internships;
- Flexible, motivated and independent person;
- Willing to accept a labour contract at the services of our clients;
- Willing to live in the Netherlands for more than one year.
  - The costs of living and eating during the Dutch course are for free;

#### **What we offer:**

- You will receive Dutch lessons during 3 months in a location in Spain.
- These lessons are free of charge, we organise free lodging and meals during the course. If you stop before the end of the course there will be no fine.
- When you finish the lessons at a B1 level you get a contract for one year with EMTG.
- 32 hours, salary between 1900 - 2500,- EURO after tax. Depending on experience. There is no trial period. Salaries are subject to the Collective Labour Agreement (CAO) of the Sector.
- EMTG will help you find housing (about 400 EURO ) if you want, health insurance will cost 90 euro. EMTG helps you through all the other procedures in the Netherlands.
- Travel costs and relocation costs can be covered by the Your First EURES Job program or "REACTIVATEJOB", no age limitation. If so You receive euro 1.050 for the costs of removing to Holland.
- You will work in one of the nursing homes for elderly located in the Netherlands as an assistant nurse.

EMTG will be your employer to Dutch law, but the manager of the institute you work will tell your tasks, organise your schedule and other things.

- The first thing you will do when you arrive is apply for an official Dutch language exam. It will take about 6 weeks before you can do the exam. During that period you will follow lessons and be introduced to the nursing home where you are going to work as an assistant nurse.

- After about 12 weeks you receive your diploma of the Dutch language at B1 level.

- MTG will assist you in the recognition process to become a BIG registered nurse in the Netherlands. This procedure will take about 10 weeks.
- After the BIG registration you are able to work as an registered nurse.

After 14 months you are free to reconsider your opportunities and free renew your contract with EMTG

#### **Requirements:**

- Nationality of a member country of the European Union;
- English or German, the level is A2 (pervert) ;

- Diploma of the education of assistant nurse of your home country;
- Allowed to provide medication to patients (certificate);
- Experience of at least two years;
- Flexible, motivated and independent person;
- Willing to accept a labour contract at the services of our clients;
- Willing to live in the Netherlands for more than one year.

#### **Labour Conditions:**

- Salary of euro 1.846,98 until 2.540,87 gross per month;
- A labour contract of 32/36 hours a week;
- A labour contract of 12 month;
- Labour contract starts directly with a course of the Dutch language. Duration of 3 month;
- The costs of living and eating during the Dutch course are for free;
- You will join the program of the European Union "Your First EURES Job" or "REACTIVATEJOB";
- You receive euro 1.050 for the costs of removing to Holland;
- Willing to start an education for assistant nurse (level 3) with more responsibility. This is a Dutch education and the cost of this study will be paid by the employer.

Vacancy number: WBS3174217

## ***Dentist ( Caminos Verdes).***

Graduating in 2018 or in the last few years and interesting in working abroad?

Following our excellent results in the last years with more than 80 dentists working in larger and smaller (family) or regional practices with individual companies or local and sometimes nationally operating groups. Video: <https://youtu.be/gD6l-mCdxPU>

#### **"The job offer": DENTISTS**

You will work in larger and smaller (family) or regional practices with individual companies or

local and sometimes nationally operating groups. They offer every general dentistry solution available in the market, and focus more and more on prevention.

#### **"Dutch Language training to B2+ level"**

To Work as a Dentist in the Netherlands you Will have to pass a Dutch Language exam at the B2+ level. The + signifies "Dental Vocabulary"

#### **"Elements of the language training and exam preparation"**

- Language training: 600 hours in Spain / Portugal or via mixed internet learning.

- Exam preparation: 3 weeks in the Netherlands Partially working in your clinic partially following Dutch lessons.

- Exam preparation training by the institute taking the exam.

Exam: During a period of 4-5 months you Will have, if necessary up to 3 opportunities to take the exam.

#### **"Guarantees"**

1. Work in an excellent clinic
2. A contract with the duration of minimum one year
3. In case you fail your exam on the First attempt:  
You Will start working as a Dentist under supervision for maximum 4-5 months.  
Contract and salary Will be the same  
You will continue your Dutch lessons  
You Will have 3 opportunities to pass the exam for free, (thereafter it will be for your own account)
4. Your clinic Will initiate training and coaching on the job from the start
5. We shall assist you with all the paperwork, housing, bank account, fiscal numbers, insurances etc.

#### **"Selection process:"**

- We select new groups every month during 2018

1. Present your CV, in English.
2. Include a photo and a copy of your passport and diploma.
3. We will call you for a skype interview and send you three documents to fill in.
4. We will invite you for an information session and first interview by Skype
5. Dutch lessons will .take 24 weeks (for the Dutch lessons a payment will be required as commitment).
6. On achieving the B1 level you will travel to Holland for face to face interviews and technical tests with your future clinic.

7. The program has several tests and exams in A1, A2 and B1 level and a final exam by an external authority at B2 + level.

8. When you have passed the exams you will start work in the Netherlands.

#### **"Salary conditions:"**

- You will start working for the first year on a fixed contract and receive a minimum (depending on experience) monthly salary of around €3.000,00 (before tax), after taxes you will earn around €2.400 net per month

After this period and with good qualifications/recommendations you will receive a new indefinite contract. Your salary, usually based on a % of invoicing, can gradually increase to around €4.500 - €5.000 (before tax) in the second year and to €7.000 or more onwards.

For Dentists with experience the Salary conditions will be different

#### **"Some specific items"**

During the first 5 (!) years you Will get a 30% tax discount;

You can only Work after BIG registration, this requires a B2+ level of Dutch;

#### **!No COST, No debt!**

- There are no cost for you with 3 exceptions:  
In case you decide, after finishing (most off) the training, not to go to Holland;  
- When you decide to leave the course before finishing it;  
- (Except for important personal circumstances);

In case you decide to Work for a clinic that is not our client (in the first year only);

## *Dentist: DPA offer*

For our state-of-the-art dental care practice, we are looking for a dentist who is enthusiastic and passionate, likes to work with people, communicates well and is challenged to work with modern materials and equipment. We offer a

stimulating work environment with a wonderful team!

The ideal candidate for this position is proficient in performing regular check-ups and complex dental procedures and is committed to the highest quality of patient care.

Your duties include:

- Diagnose and provide appropriate dental treatment to patients, including regular cleanings, repairs, root canals, surgical extractions, implants and cosmetic dentistry.
- Educate patients and parents of patients on maintaining proper oral health.
- Communicate with dental staff on our team regarding patient treatment plans.
- Prescribe medications as necessary.
- Carefully document all medications, diagnoses, treatments and consultations.
- Supervise the work of professional, technical and administrative staff.

Passion, enthusiasm and dedicated to ensuring the highest quality of care to patients are values we are looking for as we offer a tailor-made integration and training program for successful and long-term employment in the Netherlands. We offer this training in collaboration with the DPA Dentistry Academy.

DPA Dentistry is willing to offer a 16 to 20 week course to prepare you to work as a dentist in the Netherlands.

During this program, you also receive personal and intensive supervision to get accustomed to working in The Netherlands. The program consists of:

- Intensive Dutch language training from experienced tutors in Seefeld (Austria)
- Education about the Dutch dentistry protocols
- Accommodation and transport (flights)
- Paperwork and registrations
- Guidance for 3,5 years
- Dutch language exam (B2+) after finishing the course

Due to our specific training program, European residents with a European University Degree in

Dentistry/ Dental Care can apply for this job vacancy.

DPA Dentistry will invest and prepay €49.800,- (including interest), which contains all the costs mentioned above. You will be allowed a period of 3,5 years for redeeming the invested costs per month (€1245,- euros).
