

Project Manager

Functieomschrijving

The Belgian dredging, environmental and marine engineering group DEME is an international market leader for complex marine engineering works.

GeoSea is DEME's specialised company focusing on rock socketing, drilling and installation services for jetty foundations and mooring systems, the installation of offshore structures, such as small platforms and outfalls, offshore wind farms and geotechnical investigations at large depths. Because of the wide variety of specialties, we are looking for motivated candidates to reinforce our team.

- You will manage diverse aspects of the project: submission of tenders, cost calculation, contract negotiation, discussing contractual and commercial aspects, until realization on site.
- You will also create the design of the installations on a mechanical level.
- You will work in close cooperation with our clients, mostly local authorities.
- You will implement the project in accordance with the specifications and the contractual conditions.
- You will pursue an efficient way of working with our support services.

Profiel

- You are a qualified Civil Engineer, preferable with a specialization in mechanics.
- You have at least 5 years of experience, handling with complex hydraulic engineering projects within the process industry.
- You speak and write English and German fluently. The knowledge of other foreign languages is an asset.
- You are able to work independently and you are a problem-solver by nature.
- You have a hands-on mentality and value teamwork.
- You are prepared to work abroad.
