

Software Test Engineer

Vaste Job - **Online sinds 11 sep. 2018 - gewijzigd sinds 14 september**

Functieomschrijving

As a Software Test Engineer you will be responsible for the technical planning, coordination and conducting of test activities at the system level across all projects. You are passionate about high-tech software solutions and you have a desire for immaculate results. You have the talent to scrutinize the most complex systems down to the nuts and bolts. For this position, we need a test professional who is passionate about making sure that our software solutions fulfill our vision and delight our customers. To achieve this, we need someone who is constantly looking for creative ways to find issues so our customers never do. To give our clients total control of their entire operational environment we need

uncompromising software. Your meticulous work will ensure our clients are provided with a seamless experience defining the reliability of our solutions.
