

Worksmanager

Functieomschrijving

The Belgian dredging, environmental and marine engineering group DEME is an international market leader for complex marine engineering works.

GeoSea is DEME's specialised company focusing on rock socketing, drilling and installation services for jetty foundations and mooring systems, the installation of offshore structures, such as small platforms and outfalls, offshore wind farms and geotechnical investigations at large depths. Because of the wide variety of specialties, we are looking for motivated candidates to reinforce our team.

- You will be responsible for the technical implementation of our marine projects in support of the project manager.
- You will monitor the progress of projects, assist in the coordination of the work on site, and optimize and correct if necessary.
- You will report about budget and cost control in close collaboration with the project manager.

Profiel

- You are qualified (Bachelor or Master) in civil or industrial engineering in electromechanical engineering or construction.
- You are particularly interested in complex marine projects.
- You are experienced in working on hydraulic engineering, construction projects or large marine works. Experience in the installation of offshore structures is an asset.
- You are able to express yourself fluently in English.
- You are prepared to work abroad.

Jobgerelateerde competenties

- Schema's en plannen opstellen of aanpassen op basis van de functionaliteiten en karakteristieken van het elektrische of elektronische systeem
- Functionaliteiten en karakteristieken van het elektrische of elektronische systeem controleren door simulaties, tests, proeven en berekeningen

Persoonsgebonden competenties

- Zelfstandig werken
- Plannen (= ordenen)
- Zin voor nauwkeurigheid hebben
- Resultaatgerichtheid

Aanbod

If you decide to work with DEME, we offer you opportunities to develop your career in a competitive multinational and international environment, with headquarters in Belgium, and projects abroad. You will be working in close cooperation with a team of motivated colleagues.

Working for DEME often means being involved in pioneering, innovative projects. We understand that our people – their expertise, creative thinking and sheer hard work – are the foundation for the success of our business. Innovation is vital in this business if we are to stay one step ahead. Because of this, DEME makes every effort to secure special talents that will make the difference and offers top quality education and training opportunities.
